

Rubinero

Westphalian, Black, Born 1999 16.3 hands

This black stallion is really a special class stallion who unites all of the most valuable genes found in Cappeln during the past decades. His exterior and scope are striking and his movement potential along with all of his freedom at the shoulder is awesome. The dam, Faola, who is listed in the Hanoverian jumper program, passed her performance test with a well over average score (8,36) and a grade of 9.0 for willingness to perform, canter, rideability and a 10.0 for her free jumping ability. Bred in the Netherlands and then stationed in south Oldenburg, Ex Libris sired not only jumpers but also dressage horses – just like Furioso II, Inschallah AA and More Magic xx. In 2004 he presented the Olympic Game participant and winner of the finals qualification for the World Cup (in Mechelen), Escapado, under Carl Hester (GBR). The lifetime earnings of the stallions named above is nearly 4,600,000 € as of September 30, 2004 (Ex Libris 115,409 €, Furioso II 3,735,934 €, Inschallah AA 711,659 €). At his 70 day test in 2003, Rubinero achieved a total index of 133.12 (140.54 dressage index/2nd place, 115.05 jumping index/9th place), putting him on 3rd place among 46 participants. His rideability was honoured with the highest score of 10.0.

Sport highlights:

2004 participation at the Bundeschampionat in Warendorf, first and other places in novice and elementary dressage horse tests with the highest scores of 9.0, e.g. at the State Championships in Rastede where he became Vice Champion.

2005 - Qualification for the Bundeschampionat in the class for 6 year old dressage horses and several first and other places in elementary and medium level dressage horse tests.

According to an examination, Rubinero passes on dark colours only.

Licensed for Hanover, Oldenburg, Rhineland, Westphalia and southern German associations
